

State	Name	Email	Organization	Brief description/title of each primary project	For each of the above, list the primary soil health focus(s) of each	Web links
Iowa	Mahdi Al-Kaisi	malkaisi@iastate.edu	Iowa State University	Long-term tillage and crop rotations effects on soil carbon and productivity	soil organic matter, physical properties, compaction	http://www.agronext.iastate.edu/smse/
North Dakota	Naeem Kalwar	naeem.kalwar@ndsu.edu	North Dakota State University	Determining the Economic Response of Sodic Soils to Remediation by Gypsum, Elemental Sulfur and VersaLime in Northeast North Dakota on Tiled Fields	Soil water infiltration, soil dispersion, salts and sodium	
Missouri	Teng Lim	limt@missouri.edu	University of Missouri	Land application of manure Degradation of antibiotics in store manure and additional manure treatment	Soil productivity, structure, and resistance to extreme weather	
Indiana	Kenneth J. Eck	kjeck@purdue.edu	Purdue Extension - Dubois County	No formal research. Focus more on extension outreach and demonstrations.		
Nebraska	Gary Lesoing	glesoing2@unl.edu	University of Nebraska-Lincoln	Impact of baling or grazing corn stalks on soil health Impact of cover crops and grazing on soil health	Infiltration, compaction, erosion control, soil aggregate stability infiltration, compaction, erosion control, soil aggregate stability	
South Dakota	Ruth Beck	ruth.beck@sdstate.edu	South Dakota State University	Haney Test vs. traditional soil fertility recommendations for sorghum in long term no till. Livestock Integration: A Case Study	Accuracy of biological soil test and recommendations Why and what is driving producers to use soil health practices	
Michigan	Erin	hiller12@msu.edu	Michigan State University	Maximizing rye biomass for soybean production Optimizing cover crop mixture ratios following wheat	nutrient retention and cycling	
Wisconsin	Dan Cornelius	Dan@indianaglink.com	Intertribal Ag Council	Basic outreach and education, among others	All	Indianaglink.com, iacgreatlakes.com
Illinois	Duane Friend	friend@illinois.edu	University of Illinois Extension	Advanced Soil Health Training		
South Dakota	Anthony Bly	anthony.bly@sdstate.edu	SDSU Extension	cover crops, coated cover crops, cropping system changes	carbon (organic matter), infiltration, nutrient sequestration	

State	Any additional information you would like to provide	Are you aware of any Soil Health related curriculum developed in your state? Provide some basic information on the curriculum and a contact person/web link.	What type of soil health related training/materials/field days have you developed or are aware of in your state?	Any additional information you would like to provide
Iowa		We are developing soil health management manual and field guide at Iowa State University	soil health guid and soil health assessment card	
North Dakota	With the start of a wet weather cycle in NE ND, a lot of farmers opted for tiling on soils that were/are high in sodium before applying any amendment to remediate sodicity. This project will focus on remediating sodic/saline-sodic soils that are already tiled.	There are videos and publications I have developed to educate stakeholders about soil salinity, sodicity, organic matter and groundwater. Contact person can be me, Abbey Wick and Chris Augustin. Links are: https://www.ndsu.edu/soilhealth/ . https://www.ag.ndsu.edu/langdonrec/soil-health .	Field demos, tour, days, in-service workshops, conferences	
Missouri		John Lory is working on strip trials projects and P-index improvement. Rob Myers is working on cover crop Extension projects Several others are working on soil related projects too	There have been cover crop workshops	
Indiana		No known formal curricula currently in state, although numerous educational events at the county, regional, and state level are in effect each year. Most are listed, along with other related items, at the Indiana Conservation Cropping Systems Initiative website at http://ccsin.iaswcd.org/	Soil health, manure management, cover crops, etc.	
Nebraska	On this SARE funded experiment are evaluating residue cover, residue biomass & subsequent crop yield and economics following treatments On this SARE funded experiment are measuring cover crop biomass, forage quality, residue cover, subsequent crop yields, animal performance and economics	Conservation Innovative Grant to provide education on soil health to farmers, Extension and NRCS	Soil Health Programs Provided Education on Haney Test, Solvita test, Use of Cover Crops in Cropping Systems	Resources are being developed
South Dakota			Have held 3-4 large workshop/events per year for the last three years. Have held 2-6 field days per year for last three years. Events have all been well attended.	Have been very involved with the SD No Till Association for many years.
Michigan				
Wisconsin			We've done workshops	There is a major need for expanded education and awareness on soils among the groups with whom I work
Illinois		See previous information on soil health training.	Training developed by AFT and NRCS to provide knowledge in the physical, biological and chemical characteristics of soil and management systems that farmers can employ to improve soil health	
South Dakota			South Dakota Soil Health Challenge meetings and field tours, SD No-till association, South Dakota Soil Health Coalition, South Dakota Grasslands Coalition, Dwayne Beck (Dakota Lakes Research Farm), Pete Sexton Southeast Research Farm	

State	Do you have any Soil Health websites sponsored by/managed by Extension in your state? if so, please provide the URL(s).	Do you have any Soil Health websites sponsored by/managed by someone OTHER THAN Extension in your state? if so, please provide the URL(s).	Are there other Soil Health related projects/groups/initiatives you are aware of in your state?	If the above is a multi-state project, list other participating states:	OPTIONAL: Any additional information you would like to provide/interests that you have?
Iowa	In the process	NO	Soil Health Partnership led by Corn Growers Asso.	yes, Iowa, IL, IN	
North Dakota	https://www.ndsu.edu/soilhealth/				
Missouri		http://www.midmosoilhealth.com/home	same as above		
Indiana		Indiana Conservation Cropping Systems Initiative: http://ccsin.iaswcd.org/			
Nebraska	Cover Crop website http://cropwatch.unl.edu/cover-crops				
South Dakota		SD No Till Association : www.sdnottill.com SD Soil Health Coalition Facebook page	SD Soil Health Coalition is backed by the NRCS-SD		We have a large contingency of long term no tillers in central and western SD.
Michigan					
Wisconsin					
Illinois					
South Dakota		yes, No-till association, South Dakota Soil Health Coalition, South Dakota Grasslands Coalition			We have a lot of Soil Health education events happening in SD. NRCS is support many of the activities. Our corn council has hired a sustainability coordinator.
